Cobalt Strike 生成监听器

Listeners简介

在本版本Cobalt Strike 3.14中，提供了如图9种 Listener (监听器)。

Create a listener.

Name:

Payload: windows/beacon_http/reverse_http ▼

Host:

Port:

windows/beacon_dns/reverse_dns_txt
windows/beacon_dns/reverse_http
windows/beacon_http/reverse_http
windows/beacon_https/reverse_https
windows/beacon_smb/bind_pipe
windows/beacon_tcp/bind_tcp
windows/foreign/reverse_http
windows/foreign/reverse_https

```
windows/beacon_dns/reverse_dns_txt
```

```
windows/beacon_dns/reverse_http
```

windows/beacon_https/reverse_https

windows/beacon_smb/bind_pipe

windows/beacon_tcp/bind_tcp

windows/foreign/reverse_http

windows/foreign/reverse_https

windows/foreign/reverse_tcp (3.13版后增加，支持linuxSSH会话)

- beacon_xx 系列为Cobalt Strike自身，包括 dns、http、https、smb 四种方式的监听器。
- foreign 系列为外部监听器，通常与MSF或者Armitage联动。
